

Smith Works Studios

Kiln Rental Fee Schedule

The Smith Works Studios ceramics lab is a fully functional facility offering workshops as well as firing services to the public. Currently offering low and midrange electric firing options as well as a selection of studio glazes. We look forward to adding high fire (^10) in addition to soda firing options in the near future. We also have a large pit kiln that is available to workshop participants. Although Smith Works Studios uses the kilns for day-to-day production work, the kilns are also available for rent.

If you do not have access to a kiln where you are, consider using ours. It can be a great way for an individual or group to experiment with new firing techniques, glaze combinations or clay body tests.

Cost: Varying options listed below. Prices include use of studio glazes

Note: Full kiln rental must be scheduled 2 weeks in advance, as a Smith Works Studios Member must be present to fire the kiln. By-the-inch firing will be included in the next available firing. If you provide your own glaze you will be required to bring the bottle to verify the correct firing temperature.

Electric Kilns
